

Building Work Updates!

On Wednesday morning last week, we were amazed when we came into school to find a gigantic crane on our playground. Unfortunately, we were unable to go out onto the playground at break time, as the crane was working, but it was another really exciting part of the re-development of our school building. Our news team were able to go outside to watch the crane at work, which was fascinating to see. Stay tuned to our school website as we have another very exciting event next week, when the builders are going to bury our school time capsule!
