

*Make your own design for wallpaper in the square below. Look at a flower or plant, or either look at the pictures of flowers and plants here or find pictures of plants in magazines or the internet. Transform what you see into pattern. Think about flow and rhythm, detail, lines and shading. Think about the background; do you want it simple or complex?*

*Colour it with coloured pencils, thinking about what colours go nicely together to make a room look nice too.*
