

## Year 5 Science Task - Living things and their habitats

One of our Science topics in Year 5 is all about living things and their habitats. Your task is to choose one of the activities below to complete at home:

- Research a habitat that particularly interests you (Rainforest, Arctic, Desert etc.). Can you write a report or create a presentation all about what you have learnt?
- Design and create a 3D model of a habitat for a living thing of your choice.
- Draw a diagram of your chosen habitat, labelling some of the plants and animals that you would find there.
