Geography Catch Up Curriculum Vision

At St Oswald's Catholic Primary School, we aim to inspire children to look closely at the world around them and develop the skills necessary to be able to interpret what they see. We strive to make our geography curriculum creative, fun and above all relevant and meaningful to the children's own lives and experiences, with the vision to encourage our children to become global citizens. We want them to be well educated and aware of the world we live in and the positive impact that they can have.

As a result of the national lockdown due to Covid-19, there will be gaps in children's geography knowledge and skills which will need to be supported and carefully planned for. Through informal questioning of pupil's understanding and formative assessment approaches such as quizzes, we aim to make all children feel confident in what they already know, whilst identifying the knowledge and skills that need to be addressed to support them in their geography lessons through the school.

During the first half term of this academic year, teaching staff will ensure that any gaps in learning will be addressed, planned for and delivered in a 'Geography Day'. Year groups will focus on teaching the key knowledge and skills from the previous year group that the children were unable to access due to lockdown. Geography Day will give the children the opportunity to gain vital knowledge through fun and engaging activities, so they can build their confidence in geography and equip them with the appropriate skills to access their current year objectives.
