

Spring Term Year 4

What a fun filled, action packed, mind boggling term we have coming up!

We are looking forward to learning the rules of tag rugby and are eager to improve our tackling techniques in football as well as creating dance sequences in PE. We will continue to learn to code with Scratch in computing lessons and debug programs which we have loved trying to do.

In our Roman Britain History topic, we find out about the Roman invasion of Britannia and how the ancient Britons fought back. We learn about those who rose up against the Romans and the rebellions led by Caractacus and later Boudicca. We learn about the development of Roman towns in Britannia and life as a Roman soldier on the frontier.

In geography we move closer to home as we learn about coastal processes and landforms and how the location of west Wales affect its coast. We find out about coastal landforms including beaches, headlands and bays and the processes of erosion on our coastline. We will then move on to looking at the advantages and disadvantages of tourism and understand what sustainable tourism means.

In art we will create landscape art inspired by famous artists including Van Gogh and L.S Lowry. We will also explore colour mixing through printing, using two colour overlays. Our final product will be to create a land or sky, natural or industrial landscape with paint.

This term in RE we will consider what makes a community and why it is good to belong to one. We will question whether we think it is better to give or receive and why self- discipline is important in our lives.

We will be singing and playing musical instruments in science during our sound topic and will be studying furry creatures and creepy crawlies and other plants and animals that live in our local environment.
