

# St Oswald's Catholic Primary School

## Spiritual, Moral, Social and Cultural Development Policy

Approved by:	Approval date	Renewal date

This SMSC Policy is set within the context of the whole school aims and mission statement:

*Together with Jesus,  
We will Learn and Grow in Faith*

This is St Oswald's Catholic Primary School's policy for Spiritual, Moral, Social and Cultural Development and is set within the context of the whole school aims and Mission Statement.

## **Intent**

The intent of our SMSC curriculum is to ensure that school provides opportunities for pupils to develop spiritually, morally, socially and culturally. All aspects of school life and the curriculum have the potential to contribute to these four areas of development. The ethos of the school and the values that are implicit in the life and work of the school will have a powerful effect on the extent to which this potential is realised. The foundations of spiritual, moral, social and cultural development are laid at home. The school programme for promoting pupil's spiritual, moral, social and cultural development is seen as complementing and supporting the work of parents and carers. The place of spiritual, moral, social and cultural development It is important to recognise the role of the school in promoting these four kinds of development because education is concerned with more than just giving children a body of knowledge and a range of skills. A successful and improving school will have a positive effect on how children think about themselves and the world, about their notions of right and wrong, how they relate to others and their appreciation of the richness of their own and other ways of life. Spiritual Development This relates to the quest for individual identity and the search for meaning and purpose in our existence. It leads towards the understanding of self and others. It has to do with feelings, emotions, attitudes and beliefs. It is not solely linked to a particular doctrine or faith and spiritual development is therefore accessible to everyone. As a school we will strive to provide children with relevant and up to date resources to support this learning, ensuring the resources that we provide reflect the learners in our care.

## **Implementation of SMSC**

### **Aims and Objectives for Spiritual Development**

- To develop the ability to listen and be still
- To develop the skill to use all one's senses and the ability to reflect
- To develop the use of imagination to sense wonder and mystery in the world
- To develop self-confidence and the ability to recognise the special nature of human relationships.

### **Promoting Spiritual Development**

At St Oswald's Catholic Primary School we provide opportunities for pupils to develop their spirituality by reflecting on their own and others experiences, acquiring self- knowledge, thinking about their own beliefs, values and aspirations, making personal responses to questions about the purpose and meaning of life. Spiritual development is not the same as religious development, though religious education and collective worship will play particularly important roles in our Catholic school.

### **Aims and Objectives for Moral Development**

Pupils are encouraged to understand the need for a common code and to follow it from conviction rather than because of sanctions or consequences. At St Oswald's Catholic Primary School we work towards an understanding of what is right and wrong. From this basis pupils develop the ability to make judgements and to become increasingly responsible for their own actions and behaviour.

- To understand the principles behind decisions and actions and to make decisions, accepting and understanding the consequences of their actions.
- To move from a taught morality to taking responsibility for their own moral decisions. • To be able to distinguish between right and wrong and to tell the truth. • To respect the rights and properties of others
- To exercise self-discipline.
- To develop high expectations and a positive attitude
- To be considerate to others.

### **Promoting Moral Development**

St Oswald's Catholic Primary School promotes moral development through a clear code of behaviour where high personal standards are expected and children are given opportunities to think about issues concerning right and wrong.

### **Aims and Objectives for Social Development**

This enables pupils to participate fully in their family, class, school, local and wider communities. There will be a balance of the positive and satisfying elements of belonging to a group along with the demands and obligations of such a membership.

- To relate positively to others and share emotions such as love, joy, hope, anguish, fear and reverence.
- To participate fully and take responsibility in class and school and across a range of situations such as clubs, visits and church services.
- To use appropriate behaviour in a range of situations and to show care and consideration for others.
- To develop an understanding of citizenship and work co-operatively with others to become part of a caring community.
- To realise that every individual has something to offer and to use their own initiative responsibly.

### **Promoting Social Development**

St Oswald's Catholic Primary School promotes social development by encouraging people to relate positively to each other. We provide good role models in a range of situations and encourage our pupils to take responsibility and become involved in decision making.

### **Aims and Objectives of Cultural Development**

This aspect focuses on the need to develop a sense of personal identity, whilst at the same time acquiring awareness, understanding and tolerance of the cultural traditions and beliefs of others.

- To develop a sense of belonging to the pupils own culture
- To respond to cultural events.
- To share and respect different cultural traditions and experiences.
- To develop an appreciation of the Arts and a love for learning.

### **Promoting Cultural Development**

We give pupils the opportunity to engage in a range of cultural activities so that they may appreciate aspects of their own and others cultural traditions. Implementation of Spiritual, Moral, Social and

Cultural Education This will be achieved through opportunities in the curriculum for example: the teaching of Spanish in both Key Stages. Through Science by learning about famous scientists from different countries and the study of different religions as part of the R.E. programme of study. The children take part in school council activities and there Play Leaders. These provide many opportunities for learning and responsibility Adults and children, following the school Mission Statement, provide good role models at all levels. Expectation of good behaviour is high throughout the school.

**Evaluation**

The policy will be reviewed bi- annually
